I am currently a second year Computer Science student at University of Bristol who is looking for a 2026 summer internship. I am a person who is passionate about Computer Science specifically Software engineering, embedded engineering and electronics.

## Education

---

### SEPT 2024 – PRESENT

Computer Science BSc, University of Bristol

- Year 2 – current average 1<sup>st</sup> class, Computer Systems A - **70%**, Programming Languages and Computation - **73%**, Data – **83%**
- Year 1 average: 1<sup>st</sup> class, Mathematics for Computer Science B - **99%**, OOP and algorithms - **78%**, Computer Architecture - **71%**, Mathematics A - **61%**

### SEPT 2022 – JUN 2024

A LEVELS, HIGHFIELDS SCHOOL

- Subjects and grades: Maths – **A\***, Computer Science – **A\***, Physics – **A**

### SEPT 2020 – JUN 2022

GCSSES, HIGHFIELDS SCHOOL

- Grades: Maths – **9**, Physics – **9**, Biology – **9**, Chemistry – **9**, Computer science – **9**, Film studies – **7**, Spanish – **6**, English language – **6**, English literature – **6**.

## Projects

---

### Scotland Yard - University OOP unit 70%:

- A collaborative java project where the board game Scotland yard was implemented using many design patterns such as visitors, factories and observers.
- As well as an AI model to play the implementation of Scotland yard
- Scoring a 1st in the OOP coursework at the university of Bristol.

### Personal Spotify Tracker – Personal Projects:

- The spotify API in python is implemented to log songs and appends to a supabase database which stores relevant data about the song in a PostgreSQL database.
- Which can be queried by a JavaScript program for the webpage to give a detailed description of listening habits.

### Rock paper Scissors – Personal Project:

- Skimage is incorporated to represent the images as a numeric data type.
- The sklearn library to implement a K nearest neighbour model and trains on all the images of rock paper and scissors.
- Pygame is utilised to implement the camera where a frame would be fitted on to KNN model to classify the option the player chose.

### Edge Detection – Personal Project:

- A java Project which applies a convolution matrix to an image to an image and outputs an image of only the edges in the image.
- Based on the knowledge and skills taught during the Algorithms and Data unit in year 2 which I achieved 83% on.

## Work Experience

---

### TEACHING ASSISTANT

- Graduate Teacher level 1 at the University of Bristol in the school of computer science
- Help workshops for the unit “Mathematics for Computer Science A” since September 2025.
- Reteaching concepts students struggled with from prior lectures.

### TUTOR

- Tutored for a company teaching children of ages ranging 8 - 16 years olds from November 2024 – now. Tutoring primarily maths, English and programming.

## Unpaid Experience

---

### SOFTWARE ENGINEERING PROJECT

- Worked in a team with a non-technical client to produce a product of their request based on a brief
- Analysed requirements and risks based on a brief provided by a client
- Worked as both project manager and team member.
- Developed using an agile methodology producing prototype and releases to a client

### INDUSTRIAL CADETS PROGRAM

- Completed industrial cadet’s program, this is an engineering project to build a model for a crane on a nuclear site.
- Worked with a technical client to produce a prototype for the crane under their brief
- Presented our work and findings to a panel of engineers who judged the project

## Technical skills

---

- Skilled in procedural programming languages like Python and C
- Well-versed in Object Oriented Programming languages like Java
- Experienced in Concurrent languages like Go
- Qualified in multiple Functional programming languages like Haskell and Ocaml
- Experiences in web development languages such as HTML, JavaScript, TypeScript and CSS
- Capable in database design with experience in SQL, PostgreSQL and SQLite
